

# Kobalt Summer Social Case Study

## SUMMARY:

Our client approached us to help organise their summer social event at their new HQ on top of Cannon Street station, home to London's largest roof top garden. Although challenging due to the difficult access to the roof via one pedestrian lift and no vehicle parking, we rose to the challenge.

## WHAT WE DID:

- We provided a full site survey including power, water and weight loading.
- Installed specialist commercial gazebos with appropriate weights and fixings.
- We prepared a fully stocked bar with draught systems and provided bar staff to serve guests.
- Our team installed outside atmospheric lighting and sound and light for the DJ's.
- We also provided outside event furniture.
