

# Fire & Ice Marquee

## Case Study

### BRIEF:

To install a large marquee to house 160 guests for a sit down meal with a fire & ice theme.

### WHAT WE DID:

- Installed a marquee designed to be split between the two themes in the middle of the bar creating a dramatic impact between the two areas.
- Installed black lining with fire orange overlays and red LED uplighting and down washes with moving fire projections and a fire themed ice sculpture for the fire themed area.
- Provided white LED starcloth draping, washed using LED parcan and uplighters as well as ice chairs around the banquetting tables with ice themed linen and a custom made ice style light-up table centre pieces for the ice themed area.
- Provided entertainment that included many costumed performers that juggled, flame-threw stiltwalked and hoola-hooped.
- Provided a large stage, sound and lighting, a black LED dance floor and a DJ.
