

# Elizabeth & Seb // Longton Wood Wedding Case Study

## A SNIPPET OF OUR SERVICES:

- Worked with our client from concept to execution to provide a stunning all clear marquee which would allow guests to take in the natural beauty of Longton Wood.

- Provided a comprehensive power generation plan including one of our state of the art super silent Stephill event specification generators. These units include remote monitoring for peace of mind.
- Installed over 36 battery powered professional uplighters as well as over 24 IP rated parcan and wash fixtures to transform the woodland with magical lighting as night descended around the bride, groom and guests.
- We completed the marquee with a large stage equipped with a capable lighting & sound rig along with full production support for the band, The White Rooms.

## WHAT OUR CLIENT HAD TO SAY:

We spoke to a lot of marquee companies and as soon as we went to meet Party Doctors at their offices, it was clear that they understood our vision and they would put their heart and soul into it. Our wedding was such a special day and you were a massive part of making it the best day of our lives. Literally everyone at our wedding was overwhelmed with how stunning everything was, the attention to detail was outstanding and I cannot thank Party Doctors enough and their whole team were an absolute pleasure to work with.
