

Split Level Garden

Marquee Case Study

BRIEF:

We were asked in this case to do almost the impossible. Build a 4 level marquee that had a 20 degree curve.

WHAT WE DID:

- Installed a marquee that fit perfectly into the awkward shape garden.
- Secured the marquee using a combination of straps and guy ropes.
- Carpeted various sections of the marquee.
- Installed a fitted dance floor.
- Provided a full cocktail bar service.
- Offered a full photography and videography service.
- Provided a themed photo booth.
- Installed full sound and lighting.
