

Sports Hall Blackout

Case Study

BRIEF:

We were approached by a school to blackout their sports hall for an awards dinner.

WHAT WE DID:

- Installed a custom rig truss system to hold the linings due to the awkward ceiling layout and balcony.
- Installed full pipe and drape around the venue.
- Draped the ceiling using light weight casement.
- Provided low level over head lighting at the request of the client.
- Carpeted the venue in the clients chosen colour.
- Provided a cocktail bar setup complete with equipment and refrigeration.
