

Wedding Install Case Study

BRIEF:

Our clients wished to dress the room using drapes. The venue would only allow free standing drapes with only a 2 hour setup window for each area of the venue.

WHAT WE DID:

- Installed full draping and uplighting around the venue in a 2 hour time-scale.
- Installed a white LED dance floor.
- Installed a full round bar and a 4m straight bar in two different areas of the venue.
- Installed banqueting furniture and out door furniture.
- Fitted the carpet walkway for the wedding ceremony.
- Provided custom fairy light backdrops to cover various features around the venue.
