

# Cruciform Marquee

## Case Study

### BRIEF:

Our client asked us if we could provide a structure over her swimming pool and have break out marquees surrounding the area.

### WHAT WE DID:

- Installed a bespoke cruciform marquee allowing large marquees to be joined in a T-Shape, opening up a large space in the middle of the covered area.
- With uneven ground and over a swimming pool, our specialist riggers designed a temporary platform over the pool to allow access to a ladder to rig the main portal beams.
- Provided two white seating areas, an 18ft x 18ft white LED dance floor, a large stage, two curved bar sections and one straight bar section.
- Provided a photography disco package complete with computer controlled lighting for the band.
